**Atotech is truly
your single-source
supplier for
General Metal Finishing
Processes**

Atotech's General Metal Finishing Group serves a variety of Decorative markets including automotive, consumer goods, recreational goods, hand tools, appliances, and plumbing fixtures. In addition, our Functional products are used in industrial applications such as ice making equipment, fasteners, electrical connectors, aircraft components, oil drilling and chemical processing equipment — everywhere that the physical properties of specific metal coatings add value to the appearance and/or functionality of a finished product.

Atotech's global presence is a major advantage for manufacturers with international operations who demand the same quality and service at all of their locations around the world.

Give us a Toll-Free Call... we'll be glad to sit down and discuss the many reasons Atotech's GMF Processes are right for you.
